## ALU-ROUND ACCESSORIES / Wall-Arm

Although this round profile is only 24mm in diameter, it has a proportionately large aluminium weight that is able to sustain power loads of 30W/M at a stable working temperature of 55 degrees C. The choice of 3 rounded snap on diffusers including frosted and 30 degree, coupled with large range of accessories, makes this linear luminaire easily the most versatile and adaptable, for a large number of possible applications, such as a hanging rail light, picture light, retail light and numerous interior lighting designs solutions.
