

Smooth Powerline Wide 116 Suspended

41mm x 116mm

Visually, this is a very good looking, slim smooth pendant profile design, with a very high surface finish; high dissipation capability (54W/M) and a wide 116mm UV stabilised PC diffuser for optimised light distribution. The clever eye catching shaped design would not look out of place in any modern or even classic architectural ceiling project-the applications for this luminaire are endless.
