Aluminum end caps for SL15
LED profile with 30° optic lens

SLIM LINE 15 mm with optic lens 30° & 60°

SL15; 15 x 17,5mm

This is our most popular, beautifully designed slim line surface LED profile, particularly used in retail shelving applications, or stair and floor lighting, where the high silver anodised surface finish and very smooth light distribution is visually important to such installations.

The profile can accommodate 12mm wide LED PCB, and comes with a varied range of damage resistant snap in diffusers including frosted, 30 degree and 60 degree optic lens in order to facilitate accent lighting solutions
