

SLIM LINE WIDE 20mm Suspended

SLW20; 23,2 x 27,7mm

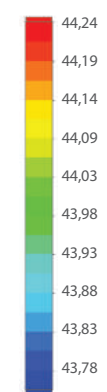

This fitting is a very attractive suspension ceiling luminaire, cleverly designed to accommodate high power LED's 25W/M with up to 18mm wide PCB capability, and even though dimensionally small comparatively, the wide diffuser gives the deceptive appearance of being a much larger fitting when illuminated, even from distance, which adds up to a positive economic consideration for the end user.
